

R8877

7 KILLICK STREET, KUNDA PARK, QLD, 4556

STAIRNOSING

MATERIALS:

Aluminium extrusion.
PVC tread insert.

LENGTHS:

The maximum length for aluminium extrusion is 6 metres. The extrusion lengths will fit together for applications longer than 6 metres.

WEIGHT:

1.223 Kg per metre.

TREAD INSERT:

A PVC tread insert comes with each length of aluminium profile. A variety of colours are available:

Light grey, black, light brown, dark brown and red.

(Other colours are available on request).

ANODISED FINISH:

Clear.

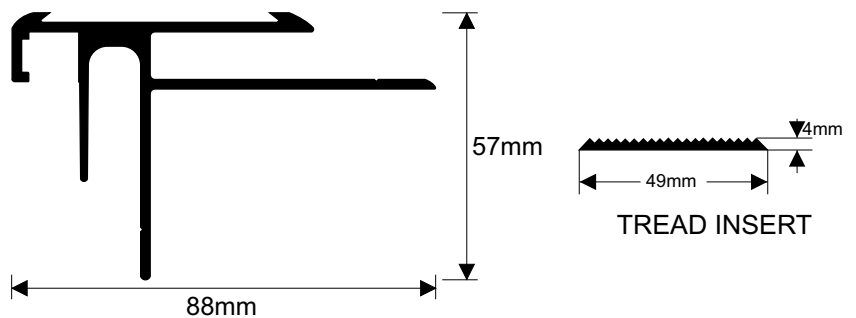

CUSTOM FINISH:

Please refer to the powder coat table for extrusion colour options.

APPLICATION:

Coupled with the R8200 tubelight, this product is designed to illuminate stairs. The aluminium profile can be installed discreetly under carpet and other flooring. The tubelight fits into the profile, washing light across each stair tread. A tread insert comes with each length of aluminium. Stairnosing can be coupled with a range of products which come in the 10 x 10 polycarbonate tube, including the R8670 LEDline. It can be installed for emergency and safety lighting applications.
